SafeIsolation**Kits**

Professional kits containing all the equipment required for safe isolation. The kit bag stores all the kit and cleverly holds the proving unit in a transparent pouch ready for use at any time.

KEWPROVE3

Proving Unit - works with all leading brands of two pole voltage detectors.
Voltage jumps to 690 V then ramps down.

LOKOFF1 KIT

4 piece lock off kit, plus a specialist padlock with pouch.

KEWISO2

Comes with a high spec and fully featured, contractor friendly KT1780 voltage detector. Continuity, phase indicator, bright torch and slim GS38 probes make for a great overall kit.

Also includes
- Kewprove3 Proving Unit
- KEWLOK - Universal Lock Off device with warning labels
- User ready carry case

KEWISO3

Comes with a high spec and fully featured, contractor friendly KT1790 (LED & LCD display) voltage detector. Continuity, phase indicator, bright torch and slim GS38 probes make for the greatest overall spec kit.

Also includes
- Kewprove3 Proving Unit
- KEWLOK - Universal Lock Off device with warning labels
- User ready carry case

KEWISO4

Comes with a dual LED (for each level) KT1720 dedicated voltage detector. It has retractable probe shrouds for extra safety and does not undertake continuity testing - which means no ambiguity.

Also includes
- Kewprove3 Proving Unit
- KEWLOK - Universal Lock Off device with warning labels
- User ready carry case
